The DICOM virtual printer for integrating all medical documents into the PACS

Easily integrate your medical documents into the imaging network

ETIAM Print-in makes it very simple to convert to DICOM format and to send all types of printable digital documents (PDF, Word, JPEG…) to the PACS.

ETIAM Print-in software installs on any computer terminal (secretary, radiologist, physician, etc.) and acts like a virtual printer.

Getting started with ETIAM Print-in is very simple and requires minimal user training.

ETIAM Print-in is the ideal and universal solution for integrating your medical documents (radiology, ophthalmology, surgery, cardiology reports…).

Using ETIAM Print-in you can link imaging studies and supporting documents, and view them simultaneously.

ETIAM Print-in is also the solution for integrating your reports on image CDs.
etiam
Integrate

Minimum Requirements

Operating system: Windows® XP, Vista, 7, 8 (32 bits)

Any word processing or document digitizing software with Windows printing capability.

1. Select the "ETIAM Print-in" printer.

2. Select patient information from the HIS (DICOM Worklist) or from a study archived in the PACS.

3. Validate. ETIAM Print-in converts the documents into DICOM and sends them to the PACS.

Features

Guaranteed compatibility

Input: All Windows software with printing capability.

Output: Conversion into DICOM PDF, DICOM SC (Secondary Capture, image or multiframe) for sending documents to the PACS or a DICOM printer.

Easy start-up and storage management

Choice of DPI resolution for control of quality and size of files produced.

Simplified user interface, automation of each step. Requires no technical training.

A plus for productivity

Integration with the information system: Use the worklist or a study archived in the PACS to assist patient selection.

Send documents on the imaging network as a background job.

Companion Products

A natural complement to ETIAM products:

- Document, image, and video digitizing (ETIAM DICOM Izer)
- DICOM report and image recording on CD/DVD (ETIAM MARS)
- Viewing and selecting DICOM images and reports (ETIAM Viewer)
- Generating worklists in medical imaging (ETIAM IDeal Broker)
- Storing, routing or exchanging (ETIAM-Connect) images and reports

Benefits

Getting started with ETIAM Print-in is very simple and requires minimal user training.

ETIAM Print-in improves the transfer of documents within the institution by making it possible to integrate all kinds of medical documents into the imaging network from a PC with Windows printing capability.

ETIAM Print-in is compatible with all PACS on the market using a DICOM connection.

Use of the imaging network (PACS) infrastructure support improves access to documents and reduces printing costs.

ETIAM Print-in enables to link imaging studies and supporting documents, and view them simultaneously.

Solution for integrating reports on image CDs (ETIAM MARS solutions).

ETIAM Print-in transfers documents associated with other imaging studies intended for other institutions by means of a image exchange system (ETIAM-Connect solutions).
